

“Feet For Your Pallet”

**Your Store’s Floors Are Being Damaged
By Wooden POP Display Pallets...**

**The PFP-3 Protects Your Floors
From Protruding Nails and Hard Splinters**

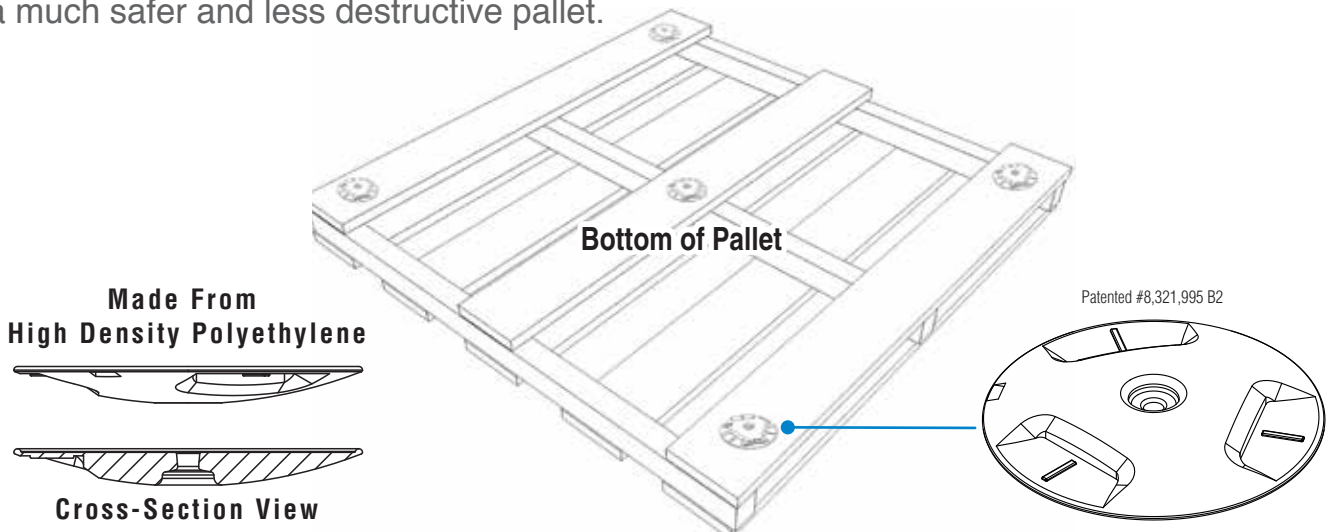

**Would you like to prevent this from happening?
Of course you do.**

Pallets become damaged with wood splinters and protruding nails. This causes damage to your floors. Our Pallet Floor Protector (PFP-3), **saves money, saves time and protects your floors. The PFP-3 makes standard wood pallets POP friendly.**

THERE SHOULD BE NO COST TO YOU, THE RETAILER. HERES HOW: The PFP-3 is a low cost solution you mandate to all your suppliers. The investment for your vendors is only \$1.72 to \$2.15 per pallet, depending on the size of the pallet. In addition, installation is very quick and simple. Not a lot to ask from your vendors, considering that it's their pallets damaging your floors.

HOW DOES IT WORK? Your vendor adds 4 or 5 Pallet Floor Protectors (PFP-3) to the bottom of a wood pallet before it is used, raising the pallet 0.5" off the floor. This creates a much safer and less destructive pallet.

ADDITIONAL BENEFITS:

Due to it's unique design and material, the PFP-3 also allows for light weight pallets to be slightly shifted on the floor without the use of pallet jacks and without scratching your floors.

Item #	Description	Minimum Quantity	Price
PFP-3	3" Dia x 0.5" H, Pallet Floor Protector	250 Packed Per Case	\$0.43 each

BEING GREEN: The PFP-3 extends the life of wooden pallets. Re-using wooden pallets is an eco-friendly decision.
